
(a) Wet-hour intensity, exceedance probability
P(rain > x | wet)
Hourly rainfall (mm/h)
Observed
V1 (fitted)
Markov-Gamma
Latent-Gaussian
Latent-Gaussian 2-scale
(b) Wet-spell length, exceedance probability
P(length > x)
Spell length (hours)
(c) Dry-spell length, exceedance probability
P(length > x)
Spell length (hours)
(d) Autocorrelation (median and 95% band, 40 runs
ACF
Lag (hours)
